A vision of global reach.

A VISION OF IMPROVING AIR.

Since 1955 at Faber we have been moving air and improving air quality in homes. Everyday we strive to improve air technology to breathe better in the home and especially the kitchen. We invented the European kitchen hood and we make them better every day. We strive to provide our customers with the ultimate in performance, quality and comfort.

INVESTING IN THE WORLD

Always growing, to serve more people.

THINKING LONG TERM

Total competence: automation, robotics, IT, total quality.

INNOVATING CONTINUOUSLY

Engineering research, advanced solutions, living benefits.

DESIGNING THE FUTURE

Ergonomics, design, functionality, comfort, style and wellbeing for the home.

Chambly - FRANCE Istanbul - TURKEY Mosca - RUSSIA Pune - INDIA

Kaluga - RUSSIA Pune - INDIA San Luis - ARGENTINA San Luis Potosí - MEXICO

Faber Technologies

Allows for longer duct runs.

Operates hood functions with an optional ADA compliant wireless remote.

Allows ventilation to be vented to the top or back. This eliminates the need for extra ducting.

An indicator on the hood signals when to wash filters.

Turns on the hood for 10 minutes automatically once every hour to refresh your home.

Turns on at the highest speed for 10 minutes.

Improves efficiency and reduces air noise.

Automatically turns the fan off after a set time (varies by the hood).

Improves efficiency and reduces air noise.

The hood moves down when needed and up when you're done cooking with a push of a button.

Permanently sets the hood to a lower CFM to meet local codes.

Makes installing and leveling the hood easier.

Energy efficient and cool to the touch LED lighting.

Metal impellers and metal housing around the motor.

A lower intensity light setting.

Spring loaded installation clips to make installation easier.

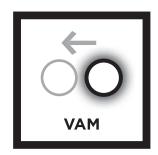

Automatically turns the hood on above a certain temperature.

Island chimneys with no vertical seams for a clean look and easy install.

Faber's new Variable Air Management System

Adjusting CFM's to meet local building codes is easy with the new Variable Air Management (VAM) feature on certain Faber models.

VAM aids in helping the installer set the speed permanently to a lower CFM based on local make up air codes. CFM (Cubic feet per minute) is the measurement of how quickly air moves. With range hoods there are building codes that limit the maximum amount of CFM a hood can output without installation of equipment to equalize pressure in the home. Our exclusive VAM technology allows you to adjust your hood to the most common CFM levels: 295, 395 or 600 class performance.

VAM is pre-installed in 13 models and with a few simple pushes of the control buttons the hood is programmed and permanently set to the CFM level for your market.

Note: Always check local make up air codes.
