

PLUM 

The perfect glass of wine, anytime.

Sometimes, you just want a glass

Enjoy a glass without pouring wine down the drain. Put any two bottles on tap and serve as much or as little as you want.

Be a better host

Let guests serve themselves at a touch of the screen and at the perfect temperature. Combine multiple Plums to create a wine menu for guests to explore.

You deserve the "special" bottle

We all have those bottles waiting for the special occasion that never comes. You can savor that treasured Bordeaux over a few weeks.

Temperature matters

Wine tastes best at the right temperature. Plum maximizes the flavor of your wine by serving every glass at its varietal ideal temperature.

For love of wine™

Your wine, your way

90-Day Preservation

A motorized needle pierces the foil and closure, protecting the flavor and aroma while preserving your wine with argon gas for 90 days.

Individually Chilled

Two silent cooling chambers are automatically set to the perfect serving temperature for each varietal, so you can enjoy Chardonnay at 48° and Cabernet at 66°.

Any Bottle, Any Closure

Plum works with any standard 750ml bottle of wine with any closure, including natural cork, engineered cork, and metal screw caps.

Fully automated

Plum automatically identifies the vintage, varietal, region, and wine connecting to rich content that lets you step into the tasting room without leaving your home.
