Memphis Wood Fire Grills prides itself on innovation, craftsmanship, and dedication to customer satisfaction. They create grills that enhance lifestyles and personal comfort while utilizing natural, renewable fuel. By designing, engineering, and testing such high performance products here in the USA, Memphis Grills incorporates convenience into everyday life. They revolutionize outdoor cooking with their technically advanced, 3-In-1 cooking centers that grill, smoke, sear, roast and bake. In 2016, Memphis Grills took the ease and sophistication of pellet grilling to another level with cloud-based Wi-Fi technology, allowing consumers to monitor their grill from anywhere.

In 2021, Memphis Grills designed and patented an industry-changing technology called IntelliBurn Technology™ that optimizes the combustion process to enhance the efficiency and performance of their pellet grills.

The new IntelliBurn Technology utilizes secondary combustion to provide the most efficient and clean burning grill on the market today.

WHY CHOOSE MEMPHIS WOOD FIRE GRILLS?

Versatility: Smoke, Sear, Bake, and Roast

Memphis Grills are the most versatile grills on the market. Unlike many pellet grills, with a Memphis Grill you can smoke, bake, roast, and sear over a direct flame at temperatures above 900°F!

Innovative Technology

Our grilling app places full control of your grill into the palm of your hand. With the Memphis Grills Intelligent Temperature Control System™, you can control your grill while you're watching the big game or relaxing with family.

The Hottest Pellet Grill

The average pellet grill can't reach high temperatures and certainly doesn't give you the option to cook over a direct flame—but Memphis Wood Fire Grills aren't your average pellet grills! With the Memphis Grill, you can cook over an open flame at temperatures that exceed 900°F, allowing you to sear like a professional chef. It's the hottest pellet grill on the market, literally.

Intelligent Temperature Control System™

This highly-accurate, automated wood pellet grill gives you set-it-and-forget-it ease and remarkable results. No more fidgeting with the knob on your gas grill or finding the right amount of charcoal. Just sit back while your Memphis pellet grill delivers consistent temperature control.

Stainless Steel Construction

The convenience and flavor of wood pellet cooking, without the big black drum. Stainless steel construction brings performance and durability, and looks like a premium professional grill.

Wood Fire Flavor

Taste is important, and cooking with wood tastes better. It's that simple. Cooking with pure hardwood provides real flavor and is preferred over charcoal or gas by grill masters and professional chefs alike.

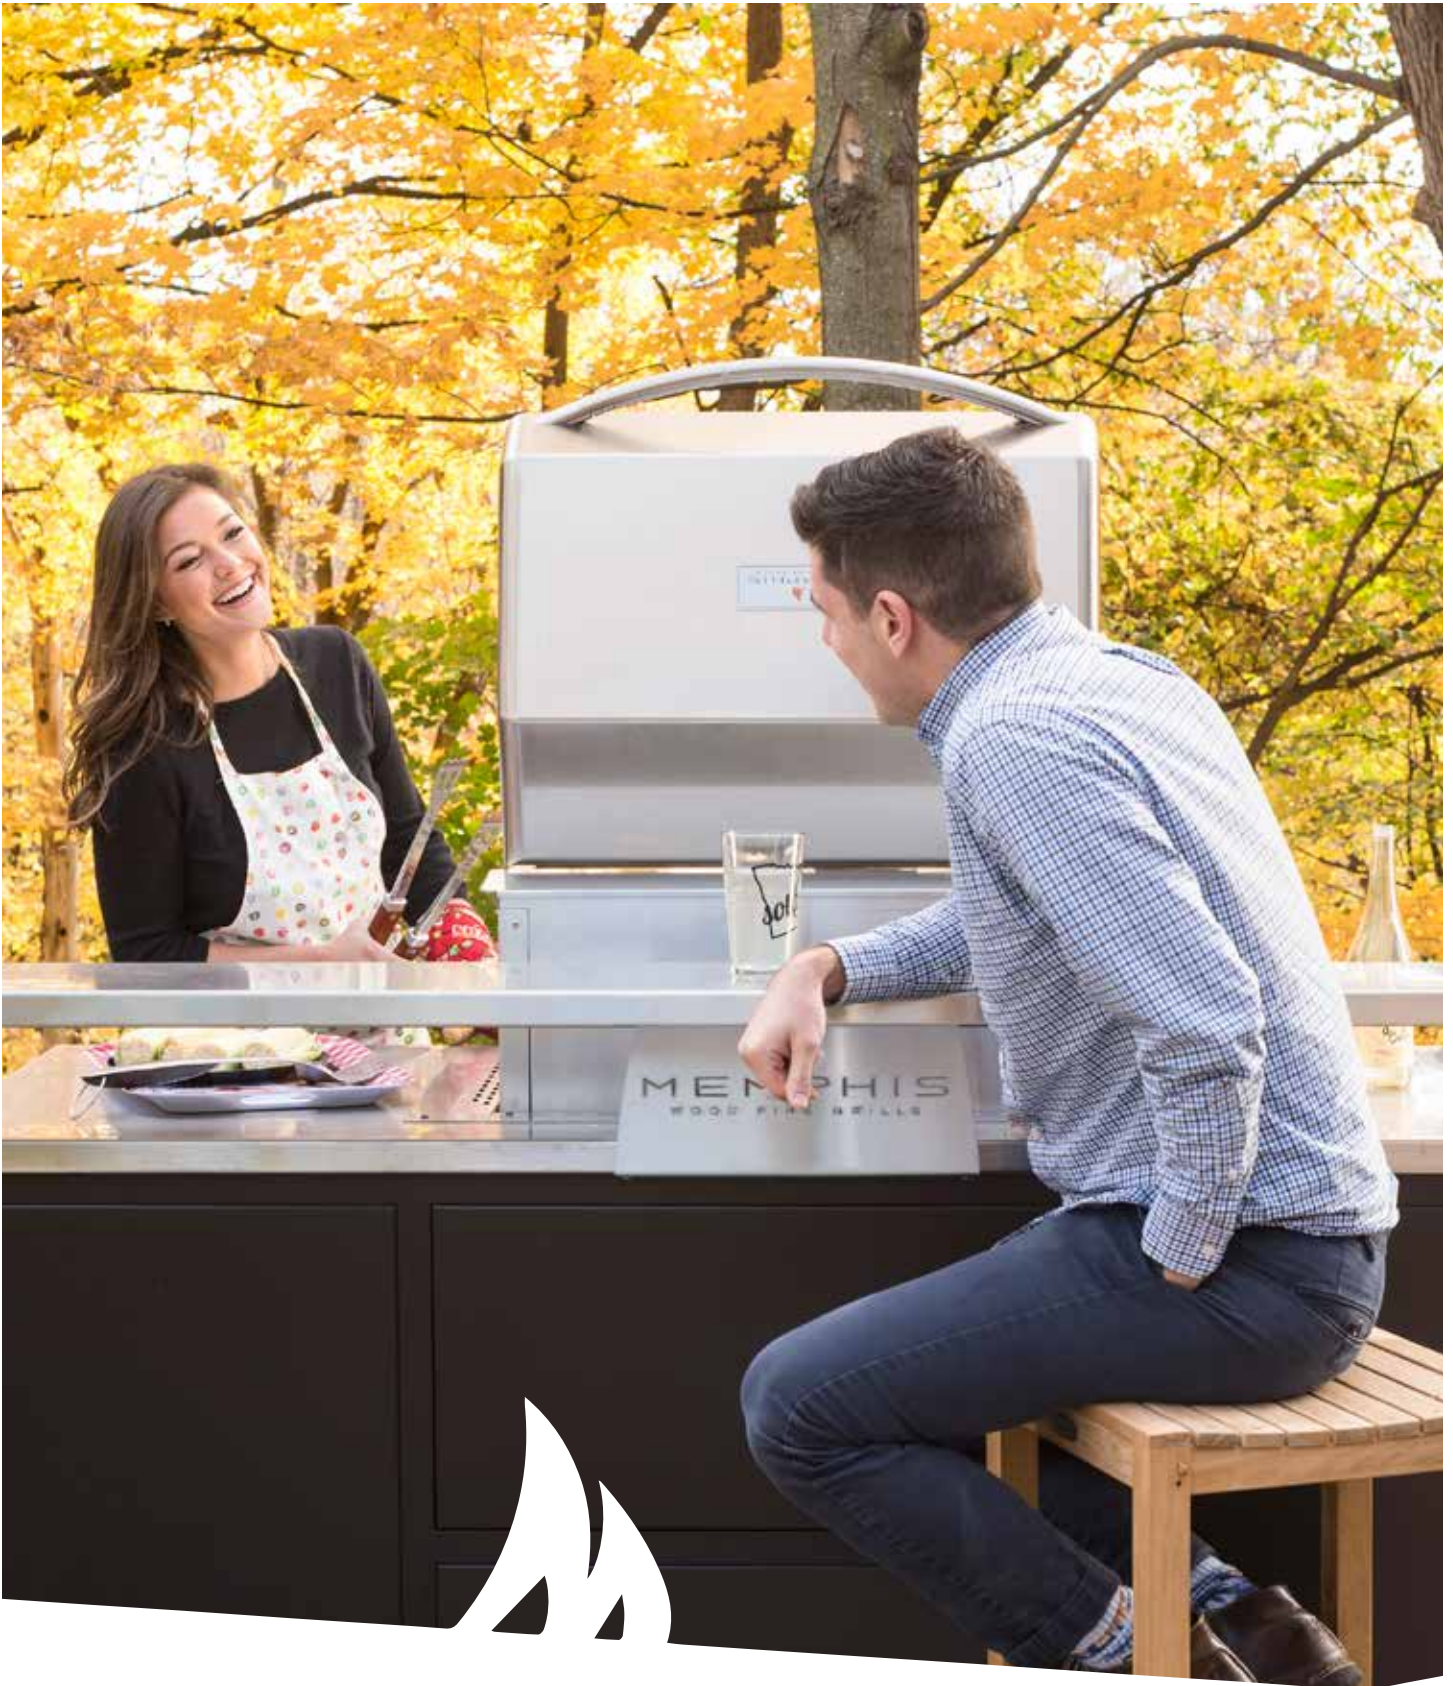

True Convection Cooking

Thanks to the DC motor and variable blower built into every IntelliBurn model, Memphis Grills are true high-end convection ovens.

Monitor Grill and Food Temps via Wi-Fi

The Memphis Grill Mobile App allows you to monitor your grill and food temperatures when you're away from your grill. Easily check your food from home, work, or your car (the passenger seat, of course).
